PENN TERMINALS

Penn Terminals represents PSA International's first foray into the United States.

Penn is one of the best equipped, privately-owned multipurpose marine terminals on the country's Eastern Coast. The terminal has recently undergone a significant capacity upgrade with the addition of two new post-panamax Ship-to-Shore (STS) cranes in late 2018; bringing its total STS count to four. It is also a key component of the perishable cargo handling infrastructure of the Delaware River, with approximately 2,850,000 cubic feet (80,400 cubic metres) of on-dock reefer warehouse space. It is estimated that close to 40% of the US fruit imports come in via the Delaware River, which tallies to about 4 million tons per year. The Delaware River's key advantage is its existing cold chain ecosystem, fulfilling importers' need for inspection, sorting, and quality checking of fresh fruit produce, prior to transport to their final destinations.

Penn is located about 9km south of Philadelphia city, with uncongested access to Interstate 95 for US East Coast destinations, and Interstate 76 for US Midwest markets.

On-dock rail service is provided by CSX and Norfolk Southern. ■

Facilities

Container berths	2
Quay length (m)	350
Area (ha)	32
Max depth at Chart Datum (m)	11.3
